

B A D C
BAHAMAS ANTI-DOPING COMMISSION

2021 ANNUAL REPORT

MAJOR ACTIVITIES

- Continuation of monthly Board Meetings virtually; due to the pandemic
- The pausing of training and competitions for most Sports
- Continuation of training for Administrative Staff
- Attendance by Administrative Staff to monthly webinars hosted by WADA
- IDCO certification for select DCOs; conducted by ITA
- Lavaldo Coverley, Lead DCO, attends the Olympics as a Doping Control Officer
- Implementation of the 2021 Code
- Creation and implementation of BADC's Anti-Doping Rules based on the 2021 Code
- Attendance to WADA's Annual Symposium virtually
- Induction of new Board Members
- Preparation for the implementation of the following items:
 - 2021 Prohibited List
 - 2021 International Standards & Guidelines
- Virtual Educational Zoom meetings hosted by BADC with physical therapists, nutritionists and Sports Doctors
- Media interviews with key media stations to discuss the importance of Clean Sports and the role of BADC
- Partnered with CMAS to provide doping control during the Vertical Blue Freediving Championships
- Website updates and revamp

EDUCATION & COMPLIANCE

Even through unprecedented times, we remained in contact with our athletes and Federations via email to ensure information was being shared on a consistent basis. Our website was updated as necessary with relevant testing and COVID-19 information. BADC hosted Educational Sessions and Information Webinars throughout the year.

WADA also provided BADC with webinars for all athlete support personnel, Federations and athletes on a monthly basis, which was shared with each respective party.

Major steps in ensuring we remain compliant with the World Anti-Doping Standards and Guidelines was the completion and updated of the following:

- Creation and implementation of the BADC Anti-Doping Rules, as per WADA standards
- Adoption and Implementation of the World Anti-Doping Code
- Providing access to the 2021 Standards & Guidelines virtually; inclusive of the new Prohibited List
- Signing of the Athlete Passport Management Unit with our WADA accredited laboratory in Canada; INRS

TESTING ACTIVITIES

In 2021, BADC's testing program faced significant limitations due to the ongoing COVID-19 pandemic. Only a total of 17 tests were completed throughout the year. This reduced number of tests was a direct result of many sports organizations suspending or significantly altering their training and competition schedules in response to the pandemic. Despite these challenges, the program continued to prioritize the enforcement of anti-doping regulations to the best of its ability under the circumstances.

SUMMARY OF TESTS COMPLETED

2021 Therapeutic Use Exemptions

There was only one TUE that was submitted to BADC for the year 2021. Details below:

SPORT	START DATE	SUBSTANCE	APPROVED/DENIED	EXPIRY DATE
Aquatics	September 17, 2021	(L-lysine-dextroamphetamine)	APPROVED	September 19, 2022

2021 Adverse Analytical Findings

There was only one AAF for the year 2021; Process investigated by World Aquatics. BADC made aware of AAF. Details below:

SPORT	Aquatics
TESTING AUTHORITY	World Aquatics
RESULTS MANAGEMENT AUTHORITY	World Aquatics
SUBSTANCE	clotestebol
DATE OF TEST	December 3, 2021
TEST TYPE	Out-of-competition
SAMPLE TYPE	Urine
CATEGORY	2.1 Presence
LAB	LAB-Cologne-GER - Köln, GERMANY

Investigations by World Aquatics pending.

There were no BADC led Doping Control investigations, no general investigations, no investigative inquiries for 2021 as Sports were paused due to the pandemic.

FINANCIAL STATEMENT OVERVIEW

This report provides an insight into our financial performance, highlighting our ability to adapt and maintain fiscal resilience amidst the challenges posed by the COVID-19 pandemic.

Budgetary Changes:

In 2021, The Bahamas Anti-Doping Commission experienced a slight increase in its budget allocation from the Ministry of Sports. Our budget grew from \$298,000 in the previous year to \$333,000. While this increase was modest, it enabled us to continue our vital work in preserving the integrity of sports in The Bahamas and maintain salaries.

Testing Income:

The year 2021 marked a slight improvement in our testing income compared to the previous year. In 2020, our testing income was non-existent due to the complete shutdown of sports activities amid the pandemic. However, in 2021, we managed to generate a little over \$3,000 in testing income, signifying a modest but noteworthy recovery.

CONTINUED...

Expense Management:

The Bahamas Anti-Doping Commission demonstrated prudence in expense management during 2021. Total expenses for the year amounted to \$179,000. Several factors contributed to this, including reduced stipends for board members and consultants, decreased operational costs, and savings in utilities due to staff working remotely. Importantly, we maintained staff salaries and employee benefits at their previous levels.

Operational Testing and Virtual Education:

It is essential to note that operational testing was significantly affected in 2021 due to the ongoing pandemic. Sports activities and competitions were limited or postponed for most of the year, leading to a reduced need for anti-doping testing. Consequently, major efforts were redirected towards virtual education and awareness programs, emphasizing our commitment to educating athletes and stakeholders on anti-doping regulations.

Conclusion:

In conclusion, The Bahamas Anti-Doping Commission navigated the challenges of 2021 with resilience and adaptability. Despite the limitations imposed by the pandemic on operational testing, we managed to maintain our financial stability and even recorded a modest increase in budgetary allocation. We are grateful for the continued support of our stakeholders and remain steadfast in our mission to uphold the integrity of sports in The Bahamas.
